Will VanderWyden

Developer / End-to-End Builder

Web and application developer with experience in Ruby on Rails, JavaScript, React, and Next.js. Built and maintain FlashCast, an automated flashcard delivery system using Discord, currently in beta with 25 active users.

Background in project and technical account management, with experience leading client engagements and delivering software solutions.

Web / App Development

FlashCast

- Designed and developed a flashcard messaging app that automates card delivery.
- Allows custom card creation, user-defined intervals, sleep/wake features, and multiple challenge modes. Written in JavaScript, hosted on AWS.

Full Stack Web Development Bootcamp

- Gained skills in Ruby on Rails, HTML, CSS, JavaScript, and database management.
- Designed and deployed full-stack web applications, including a capstone project developed with a four-person team.
- **Private Lessons** - full-featured Meetup clone with real-time venue search and improved interface tailored to organizers, pitch-to-production in 2 weeks.

Professional Experience

Operations Manager

Awesome 合同会社 2014 - Present

- Created and scaled unique social experiences and events, sustaining 12+ years' of operations driving consistent engagement and sustained revenue.
- Creative and design lead for promotional materials and web development.
- Operates weekly programs establishing scalable processes for delivery and growth.

Senior Account Manager

Nielsen 2007 - 2014

- Managed 70+ client accounts, including top ad agencies, publishers, and media outlets.
- Led nationwide software launches, driving adoption and client satisfaction.
- Collaborated with IT teams on app installations and technical troubleshooting.
- Worked with developers to enhance product features based on client feedback.

Account Executive / Project Manager

Grizzard Communications 2004 - 2007

- Managed all aspects of year-long national fundraising campaigns for national clients.
- Worked closely with IT to improve proprietary database management.
- Maintained databases of campaign history, vendor usage, and production details.
